

STRUCTURED FEEDBACK

Structured feedback has not been obtained from students and staff uptill academic session 2016-2017, however an attempt has been made to obtain the same from students and staff. A questionnaire containing 05 questions along with suggestions was designed and circulated among the students and staff. 50 odd students and 22 faculty members submitted their feedback forms.

From the analysis of the same it was found that the students by & large are satisfied with the course contents and academic process like admission, evaluation and other facilities in the college. Science faculty suggested for improvement & up gradation of Laboratories. The suggestion of the faculty has been already considered and additional equipments/facility to labs has been provided. Process for further up gradation of the labs is continuing. Suggestion of the Arts faculty viz-a-viz to limiting intake capacity couldn't be considered as the same is not under the control of the College administration. It has been decided that feedback process be strengthened by making the questionnaire more comprehensive and adding questions about academic, extracurricular and Co-Curricular factors relevant for the students point of view.
